Comparing Window Awning Series

The Deluxe series is Dometic's entry level window awning. This series comes with a vinyl fabric that helps shade your windows and keep the interior of your RV cooler. This series can range in sizes from 30 inches to 72 inches in the tall height version (see [Determining the Proper Fit](#) below) and 30 inches to 156 inches in the standard height version. Fabrics can be Azure, Maroon, Onyx, Bark, Meadow Green, or Sandstone with end caps and arms giving you the choice of white, black, champagne (beige) and satin (silver/gray). Awning rail included for mounting on the side of the RV.

Deluxe Series

The Deluxe series can also come with a metal weathershield. When not extended out, the metal weathershield automatically covers up the awning fabric protecting it from damage and the sun. This series can range in sizes from 30 inches to 156 inches in the tall *and* standard height version (see [Determining the Proper Fit](#) below). Fabrics can be Azure, Maroon, Onyx, Bark, Meadow Green, or Sandstone. With this version, you get the choice of white, black, champagne (beige) and satin (silver/gray) for the end caps *and* metal weathershield. Awning rail included for mounting on the side of the RV.

Deluxe Series with Metal Weathershield

Dometic makes the Elite series window awning for the ultimate shading of your window and protection of the fabric. Dometic's acrylic fabrics are top of the line and have much more vibrant colors. This series can range in sizes from 30 inches to 156 inches in the tall *and* standard height version (see [Determining the Proper Fit](#) below). Fabrics can be Black/Gray, Burgundy, Sand, Blue, Forest Green, or Teal. With this version, you get the choice of white, black, champagne (beige) and satin (silver/gray) end caps *and* metal weathershield. Awning rail included for mounting on the side of the RV.

Elite Series

Determining the Proper Fit

Dometic makes all three versions of their window awnings in either Standard Height or Tall Height versions based on the height of your window. If the measurement above (green arrow) is under 36", you would need the standard height version. If this measurement is at or above 36", you go with the tall version. Standard window awnings have a projection of 22" and tall awnings have a projection of 39.5". The arms are 18" tall for standard height and 30" tall for the tall version. When ordering a window awning, the fabric and roller tube MUST match the version of arms you purchase. So, for example if you have a 40" tall window, you must purchase a Tall fabric and roller assembly and a Tall set of hardware.

The size of the awning stated in the product title will always be the measurement in inches from the center of the arm on the left to the center of the arm on the right. The fabric will always be 9 inches shorter than that size. So, for example, a window awning with "156 inches" in the title will measure 156 inches center arm to center arm and the fabric will measure 147 inches. The appropriate awning rail is included in the package with the awning.

Fabric Choices

Vinyl – for Deluxe series

Acrylic – for Elite Series

Ordering Chart

Now that you know the difference between the series of window awnings that we offer, how to measure, and the fabric choices – view the chart below. Determine the series and height you want, then when you click on the color you would like, it will pull up all the available sizes on our website with current pricing. Window awnings are made to order by Dometic and typically take 5-7 business days to be made before they are shipped out either by UPS Ground or on a freight truck if they are 90 inches or longer.

Deluxe Standard	Azure	Bark	Maroon	Meadow Green	Onyx	Sandstone
Deluxe Tall	Azure	Bark	Maroon	Meadow Green	Onyx	Sandstone
Deluxe Standard with MetalShield	Azure	Bark	Maroon	Meadow Green	Onyx	Sandstone
Deluxe Tall with MetalShield	Azure	Bark	Maroon	Meadow Green	Onyx	Sandstone
Elite Standard	Black / Gray	Blue	Burgundy	Green	Sand	Teal
Elite Tall	Black / Gray	Blue	Burgundy	Green	Sand	Teal
